ABSTRACT

This study aims to describe and analyze the Singkawang City Government's strategy in recovering the private sector during the Covid-19 pandemic. The problem is that it is not yet known how Singkawang’s tourism policy will deal with pandemic conditions that impact tourist destinations in this city. The research method is a descriptive type with a qualitative approach, especially related to the COVID-19 impact mitigation strategy and the implementation of Singkawang tourism policies. Then analyze the strategic elements of a policy according to Maryati and the implementation activities of the O.Jones model. Data were collected using interview, observation, and documentation techniques. The data is then analyzed using domain data analysis techniques as a researcher's effort to get a general and comprehensive (holistic) picture of the object under study. The findings concluded that 1) the tourism covid-19 impact mitigation policy strategy was connected from the national to the local level in Singkawang in the form of directives, regulations, Covid-19 mitigation programs, and stimulus for economic recovery in the tourism sector; and 2) there are no visible creative efforts based on health protocols in organizing tourism resources, methods, and unit synergies to restore tourism, the interpretation of social media-based policies on tourist visits has not been measured, and strategies have not been implemented to meet the opportunities for pandemic trend tourism types with alternative tourism models that according to health protocol.

Keywords: Strategy; Policy; Implementation; Covid-19

A. INTRODUCTION

Singkawang City Tourism is a national tourism destination (DPN) in West Kalimantan (West Kalimantan) which is also affected by the COVID-19 pandemic. West Kalimantan, which ranks 19th province affected by the coronavirus with 50 cases on April 24, 2020 (covid19.go.id, 2020), is allegedly experiencing a decline in tourism conditions. The Cap Go Meh Chinese cultural event, which is usually crowded in Singkawang, has declined in 2020. Information from the Indonesian Hotel and Restaurant Association of West Kalimantan Province, as reported by kompas.com media, by Yuliardi Kamal, stated that there was a decline in the number of foreign tourists and local tourists who came to West Kalimantan related to the Cap Go Meh cultural event.
Since the coronavirus outbreak, several groups of foreign tourists have canceled trips and hotels, especially in the cities of Pontianak and Singkawang City. However, according to the Chairman of the Indonesian Hotel and Restaurant Association, West Kalimantan Province, as reported by kompas.com, the flight restriction policy was deemed appropriate. The government is obliged to protect its citizens so that they are safe from COVID-19. Currently, the impact of the number of tourists is reduced so that the hotel occupancy rate also drops.

Hotel occupancy rates in Singkawang, which are usually full of tourists ahead of Cap Go Meh, according to the Chairman of the PHRI West Kalimantan, in 2020, hotel occupancy rates fell by 50 percent compared to the previous Cap Go Meh celebration. Some travel agency owners also complained about the number of trip cancellations to Singkawang City.

The challenges of tourism during the Covid-19 pandemic certainly add to the burden of implementing tourism policies in standard times. Tourism policy in regular times is not optimally implemented if it relies on applicable laws and regulations such as the Undang-Undang Nomor 10 Tahun 2009 concerning Tourism, the Peraturan Pemerintah Nomor 50 Tahun 2011 concerning the Master Plan for National Tourism Development 2010-2025, the Peraturan Daerah Kota Singkawang Nomor 6 Tahun 2013 concerning Tourism Implementation (jdih.singkawangkota.go.id).

The problem is limited to the Singkawang City tourism policy strategy in mitigating the impact of Covid-19, the economic recovery of the tourism sector, and the activities of Disparpora in organizing, interpreting, and applying its policies, in particular answering the problem formulation on how the strategy and implementation of Singkawang City tourism policies face the impact of the COVID-19 pandemic?

B. LITERATURE REVIEW

According to Woll in Tangkilisan (2003:2), public policy is several government activities to solve problems in society, either directly or through various institutions that affect people's lives. Likewise, Chandler and Plano in Tangkilisan (2003:1) states that public policy is a strategic use of existing resources to solve public or government problems.

As quoted by Leo Agustino (2009: 19), David Easton defines public policy as "the authoritative allocation of values for the whole society." This definition means the authoritative allocation of values for the whole society shows that only the government as the authorized owner can legally do something to its citizens. The government's choice to do something or not to do something is realized by placing values, such as the government's actions in the operation of Large-Scale Social Restrictions (PSBB), in several areas in the context of accelerating the handling of COVID-19. The government legally does this by issuing the Peraturan Pemerintah Nomor 21 Tahun 2020, which includes allocating community discipline values to reduce activities outside the home, wearing masks, keeping your distance, avoiding crowds, etc. Several social sanctions and
fines have also been applied for violators of the Large-Scale Social Restrictions (PSBB).

This is because the government is included in the "authorities in a political system," namely the ruling party in a political system order who is involved in the routine affairs of the political system and has specific responsibilities where they are asked to make decisions at a time. Later, the decision is accepted and binds the community for a certain period. Such as implementing health protocols according to the Surat Edaran Menteri Kesehatan Republik Indonesia Nomor HK.02.01/Menkes/199/2020 and the Covid-19 Prevention and Control Guidelines released by the Director-General of Disease Prevention and Control, in every activity of the community, business, and government.

C. METHOD

The research method is descriptive research with a qualitative approach. Researchers have implemented scientific and systematic efforts to explain the tourism phenomenon of Singkawang City in dealing with the impact of the COVID-19 pandemic through mitigation policy strategies, economic recovery in the tourism sector, and implementation of organizing, interpreting, and applying activities by the Singkawang Tourism, Youth and Sports Office. The place or location of the research was carried out in Singkawang City, with the following logical reasons:

1) Singkawang City is one of the leading National Tourism Destinations (DPN) in West Kalimantan
2) The impact of the COVID-19 pandemic had occurred since the Cap Go Meh event before the coronavirus was confirmed to have entered Indonesia.
3) The Department of Tourism, Youth and Sports are directly responsible for organizing tourism in Singkawang destinations.

Subjects in this study were taken purposively and incidentally, consisting of 1) Key Informants. Namely, those who have the knowledge and have the primary information needed, such as officials in the Singkawang City Government; 2) Main informants, namely ASN in charge of tourism marketing at the Department of Tourism, Youth and Sports; 3) Additional Informants namely those who directly experience the implementation of the policy. In this study, the research team used additional informants, namely netizen participants, who were asked for online information. This study also uses random sampling to determine participants through area/regional sampling (Nufus, 2017:50). The object of research is the Department of Tourism, Youth and Sports Strategy in tackling the impact of COVID-19 on tourism in Singkawang City.

D. EXPLANATION

Based on the expert's perspective, it is concluded that public policies related to Singkawang tourism in dealing with the impact of the COVID-19 pandemic are a series of policies and or actions taken or not carried out by the Singkawang City Government with an orientation towards the goals of the vision and mission to solve public problems, mainly related to the prevention and control of COVID-19 and its impact, for the public interest in the tourism sector. The policy to make
efforts to restore or implement a new normal for tourism in Singkawang City is carried out by the provisions of laws and regulations made by the government so that it has a binding and coercive nature.

The pandemic, which began in early March 2020, was indeed surprising, especially in the tourism sector, which was previously acceptable. Workers and tourism business actors may still find it difficult to accept the reality of how they suddenly lost their jobs, stopped their business because of the pandemic that made people afraid, or were forbidden to travel before the social restrictions were introduced. Singkawang City, a tourist destination for West Kalimantan, was also affected by the Covid-19 social restrictions, which resulted in regional and community income from the tourism sector dropping drastically. Policy implementation activities in the form of organizing are an effort to determine and rearrange resources, units, and methods to make Singkawang City's tourism program face COVID-19 continue to run into results by what is expected. The goals and objectives of the policy.

All socialization of health protocols began to be encouraged by all provinces. Then to all trade sectors, tourism, all affected sectors, suddenly quieted down. From April to July 2020, the tourism sector in Singkawang was quite hit by laying off employees or temporarily closing operations. Meanwhile, the budget for activities that have been planned is also withdrawn to the center so that activities cannot be carried out. The budget withdrawal is in line with the implementation of Presidential Instruction number 4 of 2020 issued by the President of the Republic of Indonesia, on March 22, 2020, regarding refocusing budget reallocation activities and the procurement of goods and services in accelerating the handling of COVID-19. There are no activities many times it changes; even tourism permits are temporarily suspended for four months.

The tourism strategy in Singkawang City in principle follows the policy directions of the Central Government. However, in particular, the Singkawang City Tourism, Youth, and Sports Office have also designed several tourist event activities with the prerequisite that there are no social restrictions, such as in the early days of handling COVID-19. If crowds are allowed next year, then the strategy of events, competitions, competitions with attractive prizes on a regional scale can be carried out, of course, while still carrying out health protocols. The strategy, which is intended to attract the flow of tourist visits to Singkawang City, is planned to be packaged in 14 activities (not yet released because it is still a plan). Of the 14 events, routine agendas were carried out before the pandemic, such as the Cap Go Meh event, Ramadan Fair, Naik Danur, Putri Wisata; the rest was an innovation.

An innovation event that brings as many tourists as possible to take part in a competition event with big prizes, with a strategy if the participants who come, win and profit. The presence of many tourists as participants, staying, eating, participating in competitions, is undoubtedly expected to stimulate tourism in Singkawang City again. This strategy targeting West Kalimantan tourists is considered sufficient to make the hotels in Singkawang City complete, such as the long holiday period of August 2020.
The plan for 14 events in West Kalimantan Province is connected to the carrying capacity of the Singkawang City destination ecosystem, which is quite complete, including beach, lake, mountain, cultural and artificial tourism. Entering the new normal of tourism, conditions are slowly improving, marked by visits and hotel rooms starting to fill. On weekends the hotel is getting full but still in the implementation of the recommended health protocols.

The condition that tends to lead to the recovery of Singkawang tourism is that the people around Pontianak, Mempawah City, Sambas City, and Bengkayang City are encouraged to travel. After all, they feel tired of being limited so far, maybe staying at home, children also not going to school. Possibly when the weekend is a holiday, for example, they will come to Singkawang. Including the possible influence of news from Singkawang City on negative rapid test results in traditional markets. So with the status of the green zone of Singkawang City.

The second policy implementation activity is interpretation, which is various efforts to explain the substance of Singkawang tourism policies in dealing with the impact of the COVID-19 pandemic. The efforts of the Singkawang City Tourism, Youth, and Sports Office to explain various policies, programs, activities, provisions, and or other information to the public and stakeholders.

For this reason, interpretation activities should be conveyed and explained in a more functional and understandable language so that they can be implemented and accepted by the actors and policy targets or interpret so that the program becomes an appropriate plan and direction and can be accepted and implemented. Using social media such as Instagram and others is considered by the trends of the times and effectively targets the intended public. However, it is necessary to pay attention to the security and legal aspects of various means of communication so that the information is transparent, correct, and accountable.

Several excerpts of statements or opinions from these participants indicate that the public can accept or understand the policies taken by the government in terms of economic recovery to overcome the impact of the COVID-19 pandemic on the Singkawang tourism sector. The interpretation of Singkawang's tourism policy in dealing with the impact of the COVID-19 pandemic is carried out managerially by abstracting general policies, strategic directions contained in-laws and regulations, presidential instructions, and those exposed to be managed in detailed and measurable managerial functions.

Managerial interpretation is followed up operationally on technical efforts in the field so that policy objectives can be accepted and implemented. Just like the policy of encouraging the flow of tourism to Singkawang through the jargon of "Surely to Singkawang" managerially, it has gone through several stages. But of course, it will be difficult for the public to understand if it is not operationalized into various media and channels such as social media, youtube. Websites with engaging content so that they can increase their subscribers.

The activity of providing services regularly for tourism in Singkawang City is by the objectives and means of existing policies. This study collects several facts and information needed to determine the application of tourism policy as a strategy to deal with the COVID-19 pandemic. Previously, at the beginning of the
pandemic, Singkawang Mayor Tjhai Chui Mie had issued the *Peraturan Walikota Singkawang Nomor 17 Tahun 2020* Social Restrictions on Activities in Public Places and Public Facilities in Prevention of Coronavirus Disease 2019 (Covid-19) in Singkawang City. This policy applies also received responses from the following participants:

1) The government has worked well because it always appeals to the community; only the people must be aware.

2) The Singkawang city government implements a "new normal," i.e., tourist attractions are reopened but must always implement physical distancing, use personal protective equipment, wear face shields, wear masks, provide hand sanitizers and lots of handwashing places, and provide body temperature checks before entering tourism places and provide sterilization booths.

3) The government should have new rules to maintain tourism in Singkawang in the current covid pandemic.

4) Making rules according to strictly guarded protocols is not just an appeal, but tourist attractions are better managed so that the results can be utilized.

5) Continue to appeal to the public and tourism managers about the dangers of COVID-19 and how to overcome them.

6) Prepare all facilities and infrastructure to support health protocols and Covid-19 control.

7) Make strict rules for tourists when they want to visit Singkawang City.

Based on the results of an interview with the Mayor of Singkawang, it is known that the implementation of Singkawang City's tourism policy is generally also related to preventing the spread of COVID-19. There is also the factor of the *Instruksi Presiden Nomor 4 Tahun 2020* Refocusing Activities, Budget Reallocation, and Procurement of Goods and Services in the Context of Accelerating the Handling of Covid-19 is a temporary suspension of activities.

Annual routine program agendas and innovations during the new normal, with prerequisite conditions allowing crowds, implementation of plans to attract provincial-scale visits through competitions with prizes, implementation of cross-unit coordination, and application of managerial and operational interpretations using information technology, digital platforms, and other online applications, so that the public can well receive the substance of tourism policy information.

**E. CONCLUSION**

The efforts of the Singkawang City Tourism, Youth and Sports Office to determine and rearrange tourism resources (natural, cultural, artificial) in provincial-scale event packages, coordination and collaboration across work units, methods for determining local tourist targets, attractiveness events, tourism business empowerment, procedures, supervision, and technical implementation, but there is no visible creative effort based on health protocols in organizing tourism products.

The Singkawang Disparpora has carried out interpretation activities in the form of an explanation of the substance of tourism policies in a more functional and easy-to-understand language through social media (Instagram, Twitter, Youtube) whose intensity can be measured through trending topic indicators,
subscribers, followers, so that it can be implemented and accepted by the public. Actors and policy targets (netizens, followers, potential tourists, the public) and efforts to interpret so that tourism programs such as "Pasti Ke Singkawang" can be supported by the public. However, the implications for tourist visits have not been measured, and anticipation of cyber security issues, hoax news, and the like.

The efforts of the Singkawang City Tourism, Youth and Sports Office to apply the mitigation of the impact of covid-19 based on central policies and the Peraturan Walikota Singkawang Nomor 17 Tahun 2020 related to preventing the spread of covid-19, the Peraturan Walikota Singkawang Nomor 37 Tahun 2020, which regulates business activities during the new normal, but has not anticipated opportunities for new types of tourism that follow the trend of the pandemic by preparing alternative tours that do not involve many people.
